

PCFILT Version 2.xx

Computer program for the design of L-C and transmission line filters
in 32 bit Windows operating systems.

Written by:
Albert J. Klappenberger
and
Fredrick J. Radler

WARRANTY and DISCLAIMER

Warranty

The PCFILT program has been developed with great care and is thought to be "bug free", however, NO WARRANTY is expressed or liability accepted neither to this effect nor to the accuracy of the designs generated by it.

Software license

A license to use this program is granted to anyone interested in passive filter design.

- It may be freely copied and distributed.
- Make no attempt to modify the program in any way.
- It shall not to be used to design filters intended to be used in military weapons.
- The PCFILT program is totally owned and (C) Copyright registered by:
